### Instructions

To use this template:

1. In your printing software, set the print scale to 100% (i.e. no scaling) and print this template.
2. Use a ruler to check that the outer diameter is 180mm.
3. Decide the size of your clock face.
4. Cut this template out to the appropriate size.
5. Align the centre of the template over the hole for the clock's shaft.
6. Attach the numerals, dots or bars at the intersections of the guidelines.
