

EXPLORER TEST BOARD

This test board photograph was sent to us by Warwick Havyatt, of North Sydney Boy's High School. The test board was made by Mr Neil Hunt.

Warwick said that it has been a great innovation and stops foot damage to the cars. It also raises the *EXPLORER*s to a height where they are easy to observe.

Warwick also sent a photo of the *EXPLORER*s that the students build – his comment is that “The rounded or triangular bumpers we have found work well and the vehicles do not get stuck in corners”.
