

Secure your COMPUTING EQUIPMENT!

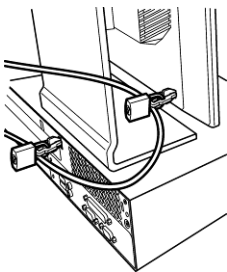

Can YOU afford to lose \$1000's worth of Laptops / PCs ?

Many organisations with large numbers of laptops and flat screen LCD monitors, face the same problem – the potential for them getting stolen.

To prevent this, we can supply an inexpensive, simple locking device. The illustrations below show how to secure your valuable equipment (more drawings overleaf).

WE CAN SUPPLY **YOU** WITH EVERYTHING NEEDED TO SECURE YOUR I.T. EQUIPMENT!

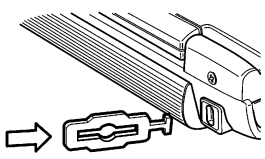

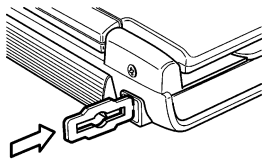

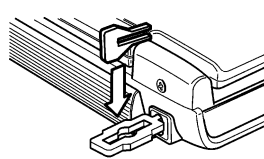

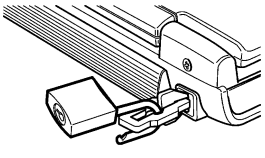

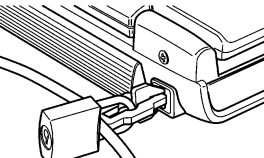

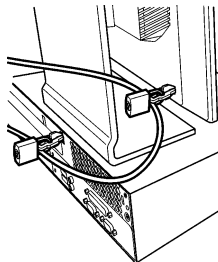

- ✓ Monitor locks – for each Laptop, Monitor and CPU
- ✓ Wire cable (plastic coated) – to join them together
- ✓ Swages – make as many cables as you need
- ✓ Padlocks - to lock them with (keyed alike)
- ✓ Wall anchors – to attach them to
- ✓ A crimping tool - to crimp the swages

Monitor lock, cable & padlock

The wire cable:

- is available in 2mm or 3mm diameter multi-strand stainless steel – plastic coated for protection.
- is flexible, for ease of use AND strong for security.
- can be made into as many cables as you need - crimp swages onto the cable to form a loop at each end.
- the crimping tool makes the assembly an easy task

USING OUR MONITOR LOCK SYSTEM

 <p>Insert part 'A'</p>	 <p>.... into your laptop etc..</p>	 <p>Slide part 'B' inside part 'A'</p>
 <p>Locate the padlock, and ...</p>	 <p>... pass the cable through the lock</p>	 <p>... and connect as many units as you need to.</p>

It's that easy to secure your computing equipment!
